OTM #: 0517

“Polaris” is a distinct perennial St. Augustinegrass variety adapted and suited for turf grass applications. It resulted from three generations of crossing among diploid St. Augustinegrass plants which were selected based upon winter survival ability and turf quality. Polaris exhibits the distinction of finer leaf quality when compared to other cultivars.

Advantages and Characteristics

- Winter survival greatly improved
- Short and narrow leaf blades
- Displays higher turf quality
- Earlier spring green up
